

“Eesha vaasyam idam sarvam”

Eesha Vasya Upanisad – 1.

All This is permeated by the Lord.

Every element, every entity, every thing and every being in the creation is filled by the divinity. Creation is manifestation of Divinity. Lord – Light – Life are the different forms of the supreme divinity.

Originally there is only ONE.

That ONE is not a thing. It is No-thing. The No-thingness is not emptiness. It is full of all possibilities. It is full of conscious-un-consciousness. The NONE, the original nothing has ONE, which has No inside it, which has none and one inside integrated into a Yes-No whole, the supreme completeness. The NONE and ONE are the two aspects of the supreme consciousness.

The ONE is Form-full, Quantitative, Tangible, graspable aspect. The NONE is formless pure Qualitative, Itangible, un-graspable aspect.

The Appearance and Non-appearance, the Quantity and Quality are integrated together it is the ultimate one.

The Qualitative aspect is Consciousness and the Quantitative aspect is Energy.

The consciousness gets manifested in life and energy gets manifested into materials.

Thus material and life are matter and mind, letter and spirit, Quantity and Quality which are nothing but Energy and Consciousness.

Everything is energy and every-being is consciousness.

Everything in this creation is energy, which is Quantitative aspect of original-No-thing.

Every-being in this creation is consciousness, which is Qualitative aspect of original-No-thing.

So where is GOD? GOD is in each element. GOD is in each being. GOD is that No-thingness from which all things and all beings Generate, because of which they operate and into which they Dissolve.

Inside and outside of each one is that Energy-Consciousness, that conscious energy.

So we all have one common origin one great original Dimension. From great-original Dimension all other dimensions are born.

Then we all have one origin. We all are because one common cause. That way we all are one. We have nothing of our own. We are not because of the cause-Supreme. We are nothing but carriers, the packages of consciousness like every atom and every material is the carrier, the package of energy.

The Carriers and Packages are not owners. They are only representatives carrying the “goods” of GOD. So we are not to own anything but transmit consciousness from one generation to another.

Our assignment is to preserve, project, propagate and pass-on the consciousness and energy. Consciousness manifests are responsibility. Responsible being is fully consciousness.

So let us be responsible for the process of continuity of consciousness.

Let us be packets of responsibility and not power centers of authority. Then all men become and be responsible, the Divinity will shine in the field of responsibility.

Then we are elements of lord and lord will illuminate each one of us.

Really, we have no authority, because the original author is supreme conscious-energy, That Nothingness.

Thus Authority is illusion and responsibility is illumination. **Ruling is death and serving is immortality.**

Let us be responsible and let us serve and experience that all permeating Divinity.

THIS IS THAT
THIS (LIFE-LIGHT) IS THAT (LORD)
