

Bit by Bit to Net by Net

27.01.1993

Man usually thinks in Bit-by-Bit fashion. The Bit-by-Bit process is basically serial. We think serially thought by thought. We move serially step-by-step. There is nothing wrong with Bit-by-Bit method. It is very useful while learning and at beginning stages of any new experience. However potential is far better and beyond the Bit-by-Bit process.

Better than Bit-by-Bit process is Hit-by-Hit process. This is the process of hitting a bright idea. Deep thinking is deep fishing. Brain storming and problem solving is Hit-by-Hit process.

What else ? Who else ? Where else ? When else ? How else ? are Hit-by-Hit process.

Better than Hit-by-Hit process is Set-by-Set process. This is break-through thinking. Whenever a subject is considered think set-by-set. When a work is to be done work set-by-set it involves the range of possibilities in any given situation. There can be any number of set types. You can think of Zero set, One set, Two set, Three set, Four set, Five set and so on. Be master of Set-by-Set. Think and make multiple contributions to Society. Set-by-Set thinking is break-through thinking. Achieve many peaks throughout life through Set-by-Set thinking.

Now let us come to the supreme way of thinking. Think Net-by-Net. Spread the thought net and collect idea fish in scores and bushels.

Whenever a subject is to be studied and ideas are to be found out write down Alphabets, A to Z vertically. Then fill up A to Z with words related to the subject.

Similarly, you can use a 10-net. Take any subject and write down at least 10 ideas related to that subject. Use the word itself as a net. For example the net for “TEAM” is Tuning, Energy, Adjustment and Mission. Use a letter net. For example use p-net for company management. P-net for company management is purpose, policy, plan, programme, people, process, project, procurement, production, product, profit, progress and peace.

Use 31 net for generating ideas for 31 days of the month. Use 99 net by using names of Allah for qualities of Good manager. Use 1000 net by using 1000 names of Vishnu for generating 1000 qualities of exemplary leader. Use any net for generating new ideas. Use picture as a thought net. Use any physical object as thought net. Use dictionary and encyclopedia as thought net.

Look up into the sky during the day and utilise the cloud formation as a thoughtnet to generate creative ideas.

Close your eyes and meditate with free thought. You will experience the inner net which is consciousness. That way you, your thoughtnet and universe will experience unity. Stop thinking. Give intervals of just being. Release with the gaps of Naught-by-Naught. (NOT-By-NOT !). Recharge yourself with physical, emotional and thought silence.

From Bit-by-Bit, to Hit-by-Hit, to Set-by-Set to Net-by-Net to cosmic net to inner net to Naught-net upgrade yourself and become an integral part of universal net work and enjoy.
