Complexity
27.06.1993

God ! for Vipin group complexity was a share,
To draw a new vision they did dare.

Complexity comes after order you see !
After complexity chaos you see.

After chaos comes clearing is to be done,
After clearing a new order is won.

This is the eternal cycle of world,
Order, complexity, chaos, clearing occur in world.

If one understands them is it very good,
This cycle, phase and remedy was understood.

God ! very complex is this world,
You being perfect why complex is world ?!

SIMPLE

Simple ! My dear Man ! this whole world,
There is no need for complexity in mind.

Originally only Me and was no world,
For my exercise is created this world.

From me the ONE are created two,
Consciousness and energy are those two.

Material world is the Energy form of Me,
All life is the consciousness form of Me.

Interaction between the two is drama of world
When two mix different forms are created in world.

When these two merged back that is the end
All will be gone Eternal is Me without any end.

Elements are renewable resources of world,
With them wonderful was the world.

Greenery came, plants came into world,
Animals and birds came into world.

It was a simple beautiful world
As a simple magnificent system was made this world.

Then Man ! you came with your mind,
You went into selfishness, greedy bind.

This world is made complex by you,
Cause of complexity are desires in you.

You built the roads, building and trees were cut
You brought clouds of wave the light was shut.

You brought factories and pollution dust
For your pleasures world is now worst.

The cause of complexity is you see,
For bringing new order now instrument you be.

Consume less and offer more and more
For clean environment marks you score

Plant many many trees and bring much green
Stop pollution re-create beautiful scene.

For this key is very simple one,
Fulfil your needs but let wants be none.

You be a part of nature be a master not,
Respecting the universe you serve a lot.

When you become simple, simple is world
Be simple one and merge in the world.

In the universal family let all live well
Then Man ! I will say "you have done well !.
